Additional Information

Projects

Home Lab & Network Infrastructure

Designed and maintained a Linux-based home lab environment, utilizing a dedicated NAS for centralized file storage and media streaming.

Managed network configuration by implementing static IP addressing for critical infrastructure to ensure high availability and consistent connectivity.

Proficient in Linux CLI (Terminal) for system administration, including file system management, software installation, and configuration editing.

Repurposed and optimized Small Form Factor (SFF) hardware, such as Lenovo ThinkCentres, into high-performance Home Theater PCs (HTPCs).
